CESAR DAVID FLORES SAN MARTIN

SENIOR FULL STACK ENGINEER | PYTHON & REACT SPECIALIST

Python Backend Architecture • Modern React • Web Applications

cedaflosa@gmail.com +593 98 507 4623 Guayaquil, Ecuador

LinkedIn / cesar-david-flores-san-martin

PROFESSIONAL PROFILE

Senior full stack engineer focused on building scalable applications with Python, Spring Boot and React. Experience with REST APIs, relational databases, authentication, queue-based processing and responsive user interfaces across fintech, SaaS and enterprise platforms. Applies clean architecture, automated testing, Docker and CI/CD to deliver maintainable web solutions.

KEY TECHNICAL EXPERIENCE

Backend
Spring Boot · Python · Go · REST APIs

Frontend
React 18+ · Angular · React Hooks

Databases
MySQL · PostgreSQL · MongoDB

Architecture
SOLID · Service Layer

Testing
JUnit · Mockito · Jest

Delivery
Docker · AWS · GCP · CI/CD

CORE TECHNOLOGY STACK

BACKEND	Python 17+, Go, Spring Boot, JPA/Hibernate ORM, REST APIs, Spring Security, JWT, middleware, queues, jobs, events
FRONTEND	React 18+, Angular, React Hooks, Redux Toolkit, React Router, Vite, JavaScript, TypeScript, responsive UI
DATA & INTEGRATIONS	MySQL, PostgreSQL, MongoDB, Redis, database migrations, API integrations, webhooks
ARCHITECTURE	MVC, SOLID, service/repository patterns, modular applications, clean architecture
TESTING & QUALITY	JUnit, Mockito, Jest, Cypress, feature/unit testing, code review, static analysis
CLOUD & DELIVERY	Docker, AWS, GCP, GitHub Actions, Bitbucket Pipelines, CI/CD, Linux, Git

AI-ASSISTED ENGINEERING | 2025·2026

AI DEVELOPMENT TOOLS	Claude Code · Cursor · OpenAI Codex · agent-assisted coding, debugging and refactoring
RULES & CONTEXT	CLAUDE.md · AGENTS.md · .cursor/rules · project instructions · repo-aware context files
SKILLS & WORKFLOWS	Reusable skills, task-specific prompts, structured implementation plans and codebase navigation
ENGINEERING QUALITY	AI-assisted test creation, code review, documentation, secure API integration and CI/CD support

Applies AI tools to accelerate delivery while retaining human ownership of architecture, security, testing, maintainability and production readiness.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Apex Global Mobility

Oct 2023 – Present | Guatemala / Remote

Enterprise digital transformation for CBC, ERP integration and modular business platforms.

- Developed enterprise interfaces with React 18+, React Hooks, Redux Toolkit and reusable components, emphasizing maintainability and responsive experiences.
- Integrated Spring Boot REST APIs with SAP-related business workflows; implemented request validation, role-based access and consistent error handling.
- Organized modular frontend features and backend services using SOLID principles, shared contracts and reusable application layers.
- Implemented automated feature and unit tests with JUnit/Mockito and Jest/Cypress; supported code review and CI/CD validation.
- Improved data-heavy forms, asynchronous workflows and API integration patterns for business-critical modules.

TECH STAC Spring Boot · Python · Go · React 18+ · Angular · Redux Toolkit · REST APIs · MySQL · MongoDB · JUnit · Jest · Docker · GCP

Full Stack Developer | The Flock

May 2023 – Oct 2023 | Miami, FL / Remote

Fintech product development for the Zigi application and supporting digital experiences.

- Built responsive React views and reusable interface modules for financial account workflows and transaction-related experiences.
- Integrated authenticated REST endpoints and collaborated on Spring Boot API contracts, payload validation and secure session handling.
- Maintained automated frontend tests and supported release verification, accessibility and consistent component styling.

TECH STAC React · Angular · JavaScript · TypeScript · Spring Boot APIs · REST · Jest · AWS

Full Stack Developer | Halo Media

Nov 2022 – May 2023 | New York, NY / Remote

Custom web products, workflow automation and enterprise integrations.

- Implemented Spring Boot controllers, service classes, JPA/Hibernate models, migrations and authenticated REST endpoints for business workflows.
- Built React 18+ interfaces with reusable components, reactive forms and Redux Toolkit state management for API-driven applications.
- Integrated external services, asynchronous jobs and queue processing, with Docker-based environments and automated tests.
- Created validation feedback, accessible forms and predictable error/loading states for business users.

TECH STAC Spring Boot · Python · Go · React 18+ · Angular · JPA/Hibernate · MongoDB · Redis · JUnit · Docker · GCP

PROFESSIONAL EXPERIENCE (CONTINUED)

Frontend Developer | Atom

Oct 2021 – Nov 2022 | South Carolina, USA / Remote

Multichannel communications SaaS and shared component development.

- Created modular React components and reusable UI patterns for messaging, configuration and account-management flows.
- Integrated Spring Boot-based REST services, pagination and role-based access; improved API error handling and data presentation.
- Enhanced localization, automated tests and release reliability for customer-facing features.

TECH STAC React · Angular · Spring Boot · Python · REST APIs · MySQL · JavaScript · Cypress · AWS

Frontend Developer | Simetrik

Jan 2021 – Oct 2021 | Bogotá, Colombia / Remote

Fintech reconciliation interfaces and data-intensive product features.

- Built React dashboards, reusable filters and large-data workflows for financial reconciliation.
- Consumed Spring Boot/Python REST APIs with authenticated requests, pagination and state management.
- Improved validation, UI performance and regression testing within CI/CD workflows.

TECH STAC React · Angular · Redux · Spring Boot · Python · REST APIs · PostgreSQL · Cypress

Frontend Developer | Mobius Group

Oct 2019 – Dec 2020 | Madrid, Spain / Remote

Vehicle-management SaaS platform.

- Developed React views and Spring Boot API integrations for fleet administration and operational reporting.
- Implemented reusable forms, server-side validation and database-backed workflows; improved performance and test coverage.

TECH STAC React · Angular · Spring Boot · Spring Boot · Python · MySQL · MongoDB · Jest · Cypress

Full Stack Developer | I-Route Solutions

Feb 2018 – Sep 2019 | Guayaquil, Ecuador

Financial-sector web platforms, service integrations and secure data processing.

- Built Spring Boot REST endpoints, business services, authentication and validated financial data workflows.
- Created React interfaces, relational database queries and third-party integrations; supported CI/CD and deployment processes.

TECH STAC Spring Boot · Go · Python · React · MySQL · SQL Server · REST APIs · AWS · GCP

Full Stack Developer | Kronio LLC

Mar 2016 – Feb 2018 | Guayaquil, Ecuador

HR management product supporting biometric attendance and administrative workflows.

- Developed Python/Spring Boot MVC modules, database models and authenticated APIs for attendance and personnel processes.
- Built React administrative interfaces and reusable forms; implemented validations, reporting and deployment improvements.

TECH STAC Python · Go · Spring Boot · React · Angular · JavaScript · MySQL · MVC · REST

EDUCATION

MSc, Application Development & Web Services | Universidad Internacional de Valencia | 2021–2022

MSc, Cybersecurity | UISEK, Ecuador | 2020–2021

BEng, Systems Engineering | UCSG, Ecuador | 2012–2019
